

PAINT COLOR & DECKING OPTIONS

THRU-FLOW DECKING

Maintenance-free, reinforced polypropylene finish allows water and debris to fall through your staircase surface. Textured finish for a non-skid surface. Thru-Flow step tread is 13" deep.

POWDER COATED ALL-ALUMINUM

Extruded aluminum decking that offers superior strength, low weight and corrosion resistance. Incorporates sound deadening material and a baked-on beige or white finish for a durable non-skid surface. Aluminum step tread is 9-3/4" deep.

WEARDECK® MARINE GRADE DECKING

Built to last a lifetime, WEARDECK® delivers unmatched strength with a wood-free, fiberglass-reinforced design that never rots, rusts, or attracts insects. WEARDECK® step tread is 11-5/8" deep.

CUSTOM STAIRCASE COLORS

PERSONALIZE YOUR ALL-TERRAIN STAIRCASE SYSTEM™

Choose from these 11 custom powder-coated color options.

Standard step width is 36"
Custom width available up to 60"

OVER 50 YEARS OF QUALITY AND INNOVATION IN MANUFACTURED STAIRWAYS AND ASSOCIATED PRODUCTS.

The stairs we build are low-maintenance and designed to make installation as easy as possible. Hewitt products are built like no other, using stronger materials and smarter design features to give you greater value. Robotic welders ensure consistent, high-quality welds throughout the supporting structure, and our accessories are made with the same commitment to quality.

Located in Nicollet, MN, Hewitt's 350,000 sq. ft. manufacturing facility annually employs 75 full-time and seasonal workers. Hewitt products are sold through a dealer network that covers the United States and extends into Canada, Belgium, Holland, Chile and Mexico.

HIGH-PERFORMANCE STAIRCASE SYSTEMS

ALL-TERRAIN STAIRCASE SYSTEM™

Hewitt All-Terrain Staircase is the perfect solution for areas where construction of a permanent staircase would be too difficult or costly. The system's unique design allows it to be adjusted to almost any terrain or slope, and we can customize steps or platforms to any specific length. Railings are standard. Landings and platforms can be added as needed. No permanent footings required – simply use the optional landing pads, or pound the support poles directly into the ground. There is no faster or easier way to add the convenience and safety of a durable stairway to your property.

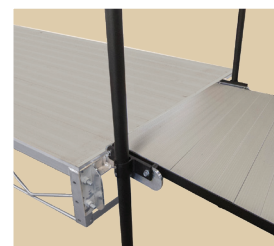

The stair treads and landings are available in two durable decking options. Corrosion-resistant powder coated all-aluminum with a baked-on finish provides sure footing even when wet. Lightweight maintenance-free reinforced polypropylene finished thruflow allows water and debris to fall through your dock surface. All components are ruggedly constructed, yet low in weight for easy handling and assembly. brackets are all made from rustproof, corrosion-resistant aluminum and never need painting.

STANDARD 5 OR 8-STEP SECTIONS

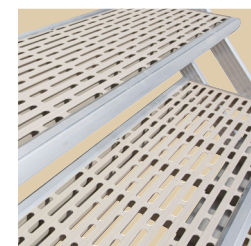

5-step sections adjust from 3' to 4-1/2' in height
8-step sections adjust from 5' to 7-1/2' in height

Adjustable Dock-to-Step Bracket
Attach an ascending or descending staircase to a dock, deck or seawall.

Adjustable Classic Dock Step Bracket
Attach an ascending or descending staircase to a classic dock.

Bullnose Step

CUSTOM ADJUSTABLE STAIRS

Looking for something unique? Hewitt Custom Adjustable Stairs are completely custom with lots of options. Choose from 11 colors and either aluminum or ThruFlow step tread.

Shown with beige aluminum steps and oil-rubbed bronze painted side and hand railings.

Optional Solid-Sided Non-Adjusting Steps

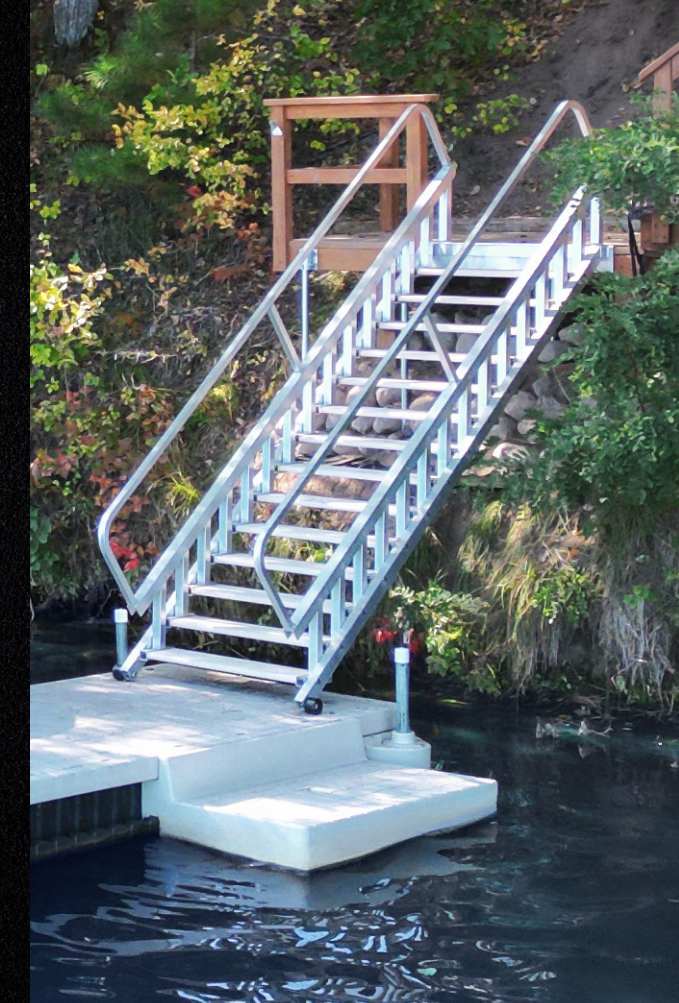

GANGWAY STAIR STEP SYSTEM

Our self-adjustable stair gangways are designed exclusively for the marine industry, providing safe and efficient access to vessels and docks. Constructed from high-quality aluminum, they are lightweight, corrosion-resistant, and built to withstand harsh marine environments. The self-adjusting design ensures seamless adaptation to changing water levels and vessel movements.

Stair treads are available in painted aluminum or ThruFlow® decking, with an optional powder coating for added protection and a customized finish. The standard stair tread width is 3 feet, offering ample footing for safety and stability. Equipped with sturdy handrails and a robust frame, our gangways meet the highest industry standards.

Available in lengths of 8', 12', 16', and 20', our gangways provide a reliable and long-lasting solution for marine access.

THE DURA STAIRS

The Dura Stairs are custom-built aluminum stairs designed to fit your specific location, providing a durable, lightweight, and corrosion-resistant solution. Engineered for strength and longevity, they can be customized to meet ADA requirements, ensuring accessibility for all users. Suitable for both indoor and outdoor use, these stairs are available in widths ranging from 2' to 12', offering flexibility for various applications.

We offer multiple stair tread options, including aluminum, ThruFlow, WearDeck, and bar grating, allowing you to choose the best fit for your environment. Hand railings are available in aluminum or sleek cable designs, with an optional powder-coated finish for enhanced durability and aesthetics.

These stairs provide a low-maintenance, weather-resistant solution, combining safety, functionality, and modern design with high-quality craftsmanship tailored to your specific needs.

Does not disturb the ground when installing in soft ground.
