

CAMPER STABILIZERS

BY
HEWITT

See the Difference!
More support. No more sway!

SECURE YOUR TRAILER WITH SOLID SUPPORT

Our lightweight but heavy-duty aluminum camper stabilizers feature stainless steel bolts with both chain and chain binders.

This bracing system works to remove the side-to-side and front-to-back frame movement. Eliminating the annoying sway as you move within your camper, and providing a very solid feeling.

Camper stabilizers can stabilize any frame height from 19 to 26 inches high – removing the rocking, wiggle, and shaking movement of your camper trailer.

Any trailer, camper or 5th wheel that has an exposed frame works well with our stabilizer. The 45-degree angle is key to giving your camper a solid stance.

- Complete with:
- Two Stabilizing Legs
 - Two Adjustable Pins
 - Chain
 - Binder
