

HYDRAULIC BOAT LIFT SYSTEMS FOR EVERY WATERCRAFT

Hewitt's hydraulic boat lift is the ultimate solution for fast, convenient, and worry-free lifting. Designed for pontoons, tritoons, recreational boats, fishing boats, and even jet skis, each lift delivers powerful performance at the push of a button. With capacities ranging from **4,400 to 24,100 lbs**, you get unmatched strength and smooth, consistent lifting across the entire arc of travel. Every model is built from corrosion-resistant aluminum and features a locking, water-resistant chest to protect the hydraulic pump and controls—ensuring long-lasting durability and dependable operation.

Engineered for industry-leading speed, each lift offers a **77.5" standard lift height**, with select models fine-tuned for specific needs—like the **4,400-lb model** with a **54" lift** or the **6,100-lb model** with **76" of lift**. Optional upgrades such as solar chargers, lighting kits, pump box stands, and full canopy systems allow you to customize your setup, while bracing and leg kits make it possible to operate in **water depths up to 10 feet**. Available in **220V AC** or **12V/24V DC** configurations, Hewitt's hydraulic hoists deliver season-after-season performance with the speed, power, and convenience serious boat owners demand.

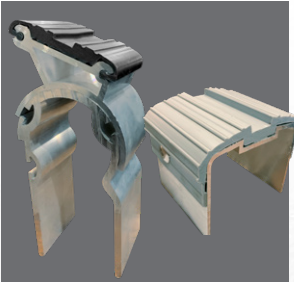

HYDRAULIC PUMP, CONTROL SYSTEM, AND CHEST

All models feature a locking, water-resistant chest that protects the hydraulic pump and controls, with added battery storage on DC units. Operate the lift using the built-in push-button controls or the convenient key-fob remote.

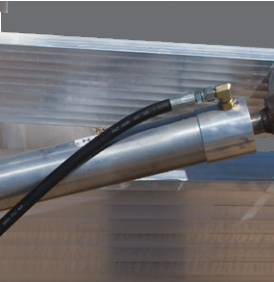

EXTERNAL FILTER

Standard on 4,400–8,100 lb pumps, the external filter protects your system by keeping hydraulic oil clean and extending component life. It also eliminates the need to remove the reservoir to reach the in-tank filters used by competitor pumps.

REINFORCED TILTING OR ALUMINUM/RUBBER BUNKS

4,400–10,100 lb lifts use full-length rubber bunks on reinforced tilting 3" aluminum channel; 12,100 and 24,100 lb models feature aluminum bunks with full-length rubber.

MARINE QUALITY CYLINDERS

Aluminum cylinders with stainless steel shafts come standard on 4,400–8,100 lb lifts, while 10,100 and 12,100 lb models use commercial-grade steel cylinders with triple-chrome shafts. All feature underwater-ready seals, water-resistant hoses, and serviceable pinned end caps for easier repairs.

WELDED PLATES

Cantilever frame features heavy-duty materials and construction. Lift arms are reinforced with extra large plates to prevent swaying.

OVER 50 YEARS OF QUALITY AND INNOVATION IN MANUFACTURED LIFTS AND ASSOCIATED PRODUCTS.

Hewitt's hydraulic boat lift is the ultimate solution for fast, convenient, and reliable boat lifting. Whether you're docking a pontoon, tri-toon, recreational boat, fishing boat, or jet ski, our hydraulic lifts deliver powerful performance at the push of a button. With lifting capacities ranging from 4,400 to 24,100 lbs, you get unmatched strength and speed—engineered to raise full loads smoothly across the entire arc of travel. Every Hewitt hydraulic boat lift is constructed with corrosion-resistant aluminum and includes a locking, water-resistant chest to house the hydraulic pump and controls.

Located in Nicollet, MN, Hewitt's 350,000 sq. ft. manufacturing facility annually employs 75 full-time and seasonal workers. Hewitt products are sold through a dealer network that covers the United States and extends into Canada, Belgium, Holland, Chile and Mexico.

HYDRAULIC LIFTS

RELIABLE HYDRAULIC BOAT LIFT SYSTEMS
FOR EVERY WATERCRAFT

HYDRAULIC PERSONAL WATERCRAFT (PWC) LIFT

Take your time on the water to the next level with our premium hydraulic PWC Lift—built for smooth, effortless launching at the push of a button. Choose the **Single** model with a strong **4,400-lb capacity** powered by one hydraulic cylinder, or step up to the **Double** with **5,000-lb capacity** and dual cylinders for even greater stability. Perpendicular bunks provide reliable support for a wide range of hulls, while an **optional center walkway** makes boarding and maintenance easy and comfortable.

With power options in **12v, 24v, and 220v**, this lift adapts seamlessly to your setup, giving you quick, confident control every time you're ready to ride. And for those who manage multiple watercraft, **Quad models** are also available—bringing the same dependable engineering to larger fleets. Built for convenience, strength, and all-season performance, this lift makes storing and launching your PWC as simple and enjoyable as your time on the water.

PWC SINGLE HYDRAULIC
4,400 capacity single PWC lift
(One hydraulic cylinder)

PWC DOUBLE HYDRAULIC
5,000 capacity double PWC lift
(Two hydraulic cylinders)

HYDRAULIC STANDARD LIFT

Hewitt offers a full range of hydraulic boat lift styles to suit nearly any watercraft and waterfront setup. From standard boat lifts to models specifically designed for pontoons or tritoons, each style is built for smooth, powerful lifting at the push of a button. Whether you're storing a fishing boat or a family pontoon, our hydraulic systems deliver speed, strength, and reliability in all water conditions.

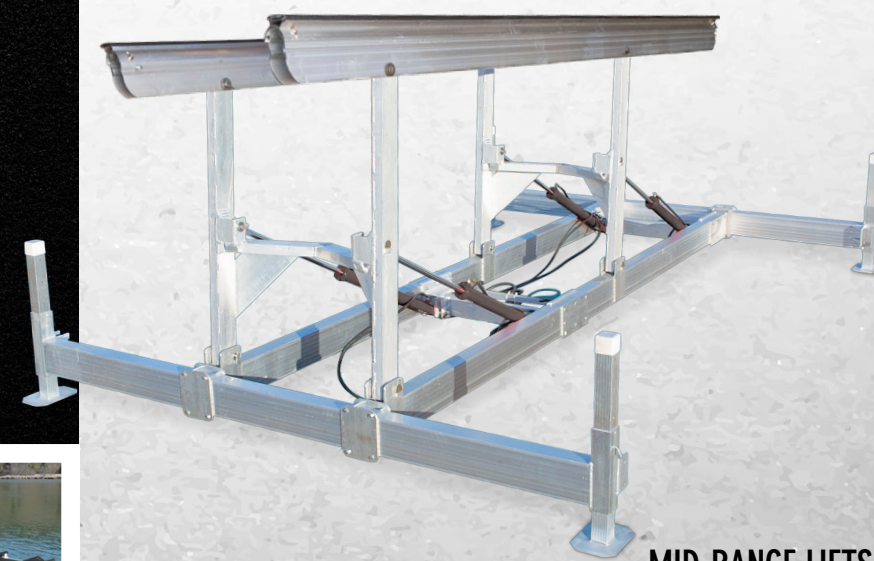

Our **standard hydraulic boat lifts** use two hydraulic cylinders with **4400 lb and 6100 lb** capacity options. Our **Mid-range hydraulic lifts** use four hydraulic cylinders with **8100 lb and 10,100 lb** options. All Hewitt hydraulic lifts are built for smooth, powerful lifting. Perfect for fishing boats, speedboats, and more—get your boat in and out of the water quickly with remote control convenience.

HYDRAULIC LIFT WITH PONTOON BED

Designed to carry twin or triple tube pontoon boats on vinyl-covered or carpeted wood bunks. The bed evenly distributes weight and provides full-length support.

STANDARD LIFTS
4400 lb and 6100 lb
(Two hydraulic cylinders)

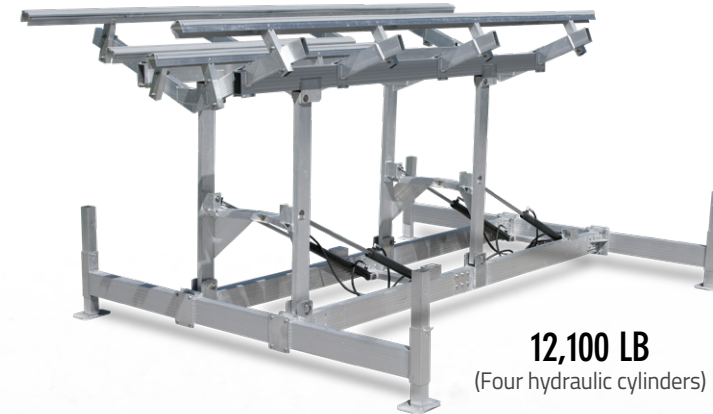

MID-RANGE LIFTS
8100 and 10,100 lb Lifts
(Four hydraulic cylinders)

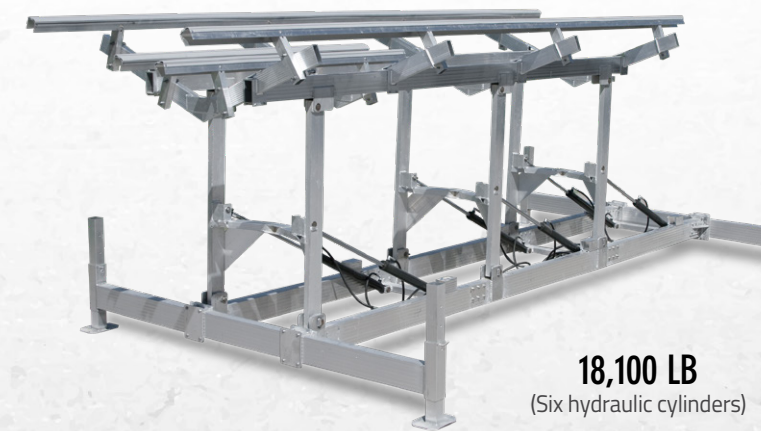

HYDRAULIC LARGE BOAT LIFT

Built for captains who demand unwavering strength and smooth, reliable performance, Hewitt's **12,100 lb, 18,100 lb, and 24,100 lb** hydraulic lifts deliver unmatched stability for large craft. These heavy-capacity models feature an upgraded hydraulic pump, heavier-gauge aluminum throughout, and reinforced bracing—bringing the speed and convenience of smaller lifts to boats that require far more muscle. From the moment you engage the system, you'll feel the confidence of a lift engineered for serious weight and everyday ease of use.

Calling them heavy-duty hardly does them justice. Each lift is built on **3-3/4" x 7-1/2" structural aluminum tubing** with a massive **.345" wall thickness**, and **3/8"-thick tubing** in the lift arm uprights. Four **3-1/2" square x 48" leveling legs** and fully adjustable aluminum/rubber bunks ensure secure positioning and customized support. With a **77-1/2" lift height** and optional bracing and leg kits, these models can operate in **water depths up to 10 feet**. Designed for durability, precision, and the demands of larger vessels, this series sets a new standard for serious lifting power.

12,100 LB
(Four hydraulic cylinders)

18,100 LB
(Six hydraulic cylinders)

24,100 LB
(Eight hydraulic cylinders)
