

ACCESSORIES

DOCK ACCESSORIES

- Benches, Umbrellas and Patio Chairs
- Dock Cleats, Post Caps and Covers
- Dock Wheels and Accessories
- Brackets and Lights
- Augers, Pipes, Tires and Bracing
- Dock Ramps and Corner Triangles
- Storage Boxes and Coolers
- Ladders and Steps
- Kayaks and Accessories
- Dock Gates
- Float Tanks
- Galvanized Dock Hardware

LIFT ACCESSORIES

- Centering Guides and Catwalk
- Pontoon Conversions and Accessories
- Bunks and Bunk Treads
- Lift Legs and Extensions
- Tie Downs and Augers
- Lift Wheels
- Winches and Wheels
- Solar Panels and Battery Stand
- Hoists

BUMPERS

THE INDUSTRY'S FINEST QUALITY, WORKMANSHIP AND DESIGN.

- Corner Bumpers
- Torpedo Bumpers
- Adjustable Bumpers
- Rectangular and Edging Bumpers
- Rub Rails
- Lift Bumpers, Full Length Guides and Motor Stop
- Many Colors Available

PROTECT YOUR INVESTMENT.
SKIP THE HASSLE!

The Marine Concepts **FAST TRACK SYSTEM** keeps your boat clean with a custom fit that goes on in minutes.

EASILY COVER YOUR BOAT IN MINUTES!

PULL
Your cover glides on and off like a curtain with our patented track system.

ZIP
Close your cover effortlessly with one pull of our zipper rope.

SECURE
Seal and secure your boat with our drawstring design.

DECKING OPTIONS & CANOPY COLORS

A GOOD IDEA THAT KEEPS GETTING BETTER

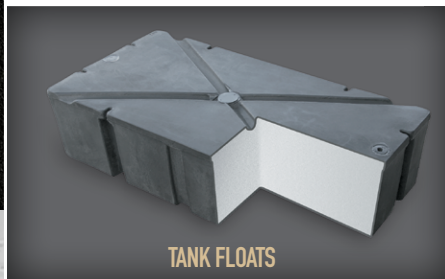

Over 50 years of quality and innovation in manufactured docks, boat lifts and associated products.

HOW IT BEGAN: In 1971, Larry Hewitt purchased Bauer Welding Shop in Nicollet, Minnesota. A typical work day consisted of welding, machining, automotive repair or fixing and selling lawn mowers. Hewitt's business may have remained small if it were not for a friend with a back injury who approached him with a request to build a dock that would be easier to put in and out of the water. Together, they did some brainstorming, consulted a do-it-yourself book and studied the construction of rafters that Hewitt's uncle used in his metal business. Setting to work, Hewitt built a 64-foot-long dock that rolled on two sets of car tires. The dock's construction featured light-duty steel building trusses instead of conventional lumber. That single dock changed everything.

Today, Hewitt Machine & Mfg. Inc. is known to marine dealers as an industry leader in dock and boat lift design. While still located in the town of Nicollet, the small welding shop has grown into a 350,000 sq. ft. manufacturing facility. Annually, the company employs 75 full-time and seasonal workers. Hewitt docks, lifts and associated products are sold through a dealer network that covers the United States and extends into Canada, Belgium, Holland, Chile and Mexico.

IT'S THE PARTS YOU DON'T SEE THAT MAKE THE DIFFERENCE IN RELIABILITY

The docks and lifts we build are low maintenance and designed to make installation and removal as easy as possible. Hewitt products are built like no other, using stronger materials and smarter design features to give you greater value. Robotic welders ensure consistent, high-quality welds throughout the supporting structure, and our accessories designed to aid installation and protect your dock and lift are made with the same commitment to quality.

HIGH-PERFORMANCE WATERFRONT PRODUCTS

DOCKS

ROLL-A-DOCK

Just roll it in and you're ready for action. Design your own layout and extend to virtually any length.

ULTRA DOCK

Need a durable dock like the Roll-A-Dock but don't have the shoreline to roll in for storage? The Ultra Dock is your ideal stationary solution, featuring a tubular frame for superior strength and clean, modern lines.

FLOATING DOCK

Floating dock systems feature durable galvanized steel or aluminum frames, high-capacity flotation, and a modular design customized to your waterfront. Optional roof packages add shade and protect your boat from the elements.

CLASSIC DOCK

The Hewitt Classic Dock offers a traditional look with a strong, modular design. Large sections and optional wheels make setup easy, and the aluminum frame means minimal maintenance.

WAVE DOCK

Wave Docks are modular, easy to assemble, and perfect for residential or marina use. With textured decking, foam-core floats, and a patented H-Beam system, they offer durability, style, and expandability.

LIFTS

NEW HYDRAULIC VERTICAL LIFT

The all-new Hydraulic Vertical Lift combines rugged construction, powerful performance, and a low-profile frame, with a redesigned pump box for quick, easy maintenance.

CANTILEVER LIFTS

Rugged lifts available in standard or hydraulic models for boats, pontoons, personal watercraft and airplanes. 1200-5200 lb.

HI-LIFT VERTICAL LIFTS

The Hewitt Hi-Lift is an economical, direct vertical rise lift ideally suited for deeper water applications or sites where water levels may fluctuate. Fits PWC's, Boats, and Pontoons from 1100lbs to 6600lbs.

DRIVE-ON PORTS

Wave Armor drive-on ports support boats up to 30', providing modular floating design, full-length hull support, and up to 8,000 lbs of lift with no air assistance.

HYDRAULIC BOAT LIFTS

Hewitt's hydraulic boat lifts deliver powerful, push-button performance for pontoons, tritoons, boats, and personal watercraft, with lifting capacities ranging from 2,500 to 24,100 lbs.

STAIRS

Hewitt's all-terrain dock steps offer safe, adjustable access for uneven shorelines where permanent stairs aren't ideal. Made from durable aluminum, they include handrails, optional landings, and need no permanent footings—just landing pads or support poles. Perfect for lakeside or temporary use.

MARINA

Hewitt Marina Docks deliver top-tier durability and versatility for commercial waterfronts. Designed for shifting water levels and harsh conditions, they offer stable, low-maintenance docking with corrosion-resistant materials and lasting visual appeal.

QRAMP

QRamp uses powder-coated aluminum and ThruFlow™ decking for a strong, modular ramp system. Its non-slip surface sheds rain, snow, and debris, minimizing buildup and maintenance. Built for lasting durability and performance.

PONTOON LEGS

Hewitt Pontoon Legs let pontoon boats stand on their own using 12V battery power. Made from high-grade structural aluminum, they bolt directly to the boat's frame. They help protect your pontoon's value, eliminate tie-offs, and free dock space.
